ICD-10 Coding Class

The ICD-9 CM code sets used to report medical diagnoses and inpatient procedures will change on October 1, 2015. In this course, participants will learn to navigate the new ICD-10 CM format and to accurately code medical diagnoses using the ICD-10 CM. The ICD-10 CM is arranged by body system, so a good knowledge of Anatomy & Physiology will help participants succeed. This class is ideal for those individuals currently working in medical coding!

This is a hybrid course. Classes will meet both on campus and online. 
Excellent computer skills are a must in order to successfully complete this class.

Tuition: $183

Location:
SCC J-Building
Room J107

Class Schedule:
August 20 - October 8
Tuesdays and Thursdays
6:00pm - 10:00pm
