

Technical Standards: Construction Management Technology

All Students in this program are expected to meet certain essential functions/technical standards which are essential for successful completion of all phases of the program and which reflect industry requirements and standards. To verify the students' ability to perform these essential functions, students may be required to demonstrate the following technical standards:

Standard	Definition of Standard	Example(s) of Technical Standard
CRITICAL THINKING SKILLS	<ul style="list-style-type: none"> • Students must be able to use logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems • Must be attentive in the classroom, observe demonstrations and participate in lab classes • Must be able to recognize when there is a problem or possible problem 	<ul style="list-style-type: none"> • Ability to determine the steps necessary to troubleshoot mechanical systems including electrical and plumbing. • Ability to assess causes of equipment malfunctions and solutions. • Ability to identify equipment preventive and maintenance needs and perform maintenance and preventive services. • Ability to determine appropriate tool needed to repair structural, electrical, and plumbing systems. • Sufficient motor skills to quickly and repeatedly adjust system controls or equipment to exact settings. • Must be able to read and interpret wiring diagrams, meters, gauges, manifolds and electrical instruments.
MOTOR SKILLS	<ul style="list-style-type: none"> • Students must possess physical strength, flexibility, and dexterity to safely perform electrical, plumbing, and carpentry services 	<ul style="list-style-type: none"> • Physical abilities sufficient to perform technical skills in a hot (90+ degree) and cold environment. • Physical ability sufficient to crawl under structures or confined spaces while carrying tools and equipment. • Physical ability to use various hand tools. • Be able to climb ladders up to 10' in height while carrying tools and equipment. • Sufficient motor function to execute hand movements required to install and service electrical, plumbing, and mechanical systems. • Physical ability to coordinate two or more limbs (two arms, two legs or one arm and one leg) while sitting, standing or lying down. • Weight bearing ability sufficient enough to lift and carry weight up to 50 pounds and work overhead.
TECHNOLOGY SKILLS	<ul style="list-style-type: none"> • Ability to convey information effectively and efficiently in class or lab settings 	<ul style="list-style-type: none"> • Must be able to read and interpret wiring diagrams, meters, gauges, manifolds, and electrical instruments. • Must be able to read prints, schematics, meters and testing equipment. • Must be able to check email and create/edit basic documents.
AUDITORY SKILLS	<ul style="list-style-type: none"> • Must be able to recognize when there is a problem or possible problem • Must have an awareness of surrounding through use of senses 	<ul style="list-style-type: none"> • Sufficient auditory skills to hear tones of various pitches emitted by testers and meters. • Sufficient auditory skills to hear equipment running/operating to determine efficiency of operation.
VISION SKILLS	<ul style="list-style-type: none"> • Must have visual perception • Must be able to use sensory cues to maintain standards of quality 	<ul style="list-style-type: none"> • Ability to identify various preventive and maintenance needs and perform maintenance and preventive services.

Standard	Definition of Standard	Example(s) of Technical Standard
	<ul style="list-style-type: none"> • Must be able to recognize when there is a problem or possible problem • Must have an awareness of surrounding through use of senses 	<ul style="list-style-type: none"> • Ability to determine appropriate tools needed to repair electrical, plumbing, and structural systems. • Visual skills sufficient to distinguish all primary colors. • Visual skills sufficient to see details at close range. • Have sufficient visual capacity to read prints, schematics, meters and testers.
COMMUNICATION SKILLS	<ul style="list-style-type: none"> • Ability to convey information effectively and efficiently in class or lab setting 	<ul style="list-style-type: none"> • Must be able to communicate effectively with the instructor and other students. • Must be able to understand and interpret information from textbooks, handouts, diagrams, charts and tables. • Must use written and oral communication to demonstrate comprehension of technical concepts. • Must recognize and be able to use electrical, plumbing, and building terminology.
INTERPERSONAL SKILLS	<ul style="list-style-type: none"> • Students must have sufficient personal skills for successful interactions with customers, colleagues, supervisors, and students from a variety of social, emotional, cultural, and intellectual backgrounds • Must possess emotional well-being and intellectual abilities to complete all projects and responsibilities in the classroom • Student will be expected to learn and apply workplace responsibilities 	<ul style="list-style-type: none"> • Must be able to work cooperatively with partners and groups. • Interpersonal abilities sufficient to interact with co-workers under physically and mentally demanding environmental conditions. • Be careful about detail and thoroughness in completing work tasks. • Exercise good judgment. • Follow safety procedures. • Maintain composure, keep emotions in check, control anger, and avoid aggressive behavior, even in difficult situations. • Must not have a debilitating fear of heights, insects, spiders, snakes, or lizards.
ENVIRONMENTAL TOLERANCE	<ul style="list-style-type: none"> • Must be able to work in an industrial or construction environment 	<ul style="list-style-type: none"> • Must be able to work effectively in confined spaces such as under structures. • Must be able to tolerate extreme heat and cold. • Must be able to tolerate exposure to noxious chemical compounds including but not limited to acids, acid-like chemicals, solvents, glues, cleaners, oils and refrigerants. • Must be able to wear hard hats, safety glasses, steel toe shoes and other safety related equipment as required by the industry.
WORK SKILLS	<ul style="list-style-type: none"> • Ability to participate in a work-based learning experience 	<ul style="list-style-type: none"> • Students will need to travel to a worksite. • Students may be required to pass a drug screening and/or background check. • Students may be required to obtain certain immunizations.
